

GLENDALE COMMUNITY COLLEGE AUTOMOTIVE DEPARTMENT M.A.A.P. - Modular Accelerated Automotive Program

You can complete the Automotive Technology portion of this program in less than one year.

You will learn "Bumper-to-Bumper" technology.

Most classes are taught from 7:30am to 12:30pm and credits transfer to ASU or GCC A.A.S. Degree program.

Classes prepare you for ASE testing.

These are the same classes and subjects as taught in the regular A.A.S. degree program.

CERTIFICATES - Certificate of Completion Automotive Programs

Students who have an interest in a specific area of automotive technology and do not wish to obtain the available A.A.S. degree may opt to complete one or more Certificate of Completion Programs instead. Each program requires approximately 16 credit hours to complete and does not include any general education requirements.

Certificate of Completion programs are available at Glendale Community College in three Automotive Technology Areas;

Automotive Engines and Drive Trains Certificate

Automotive Engine Performance Diagnosis and Air Conditioning Certificate

Automotive Chassis Certificate
