

Introduction

This document is meant to be a guide for anyone trying to enable access to their eGCC H: Drive (personal space on the eGCC Server) on their *Windows XP* laptop or desktop computer. These instructions are written specifically for Windows XP users.

Here is what you will need to have:

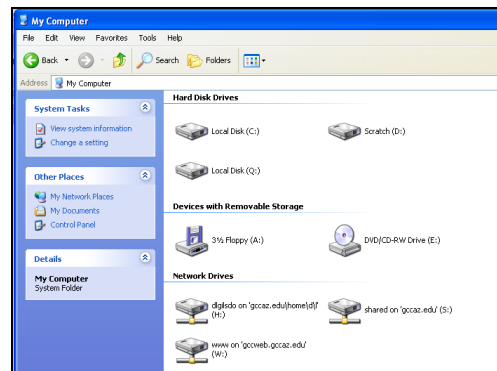

- **Windows XP installed on computer.**
- **Your eGCC Username and Password:** For eGCC Username and Password account information, please contact the Helpdesk.
 - In person: Our main Helpdesk is located in HT1 inside the west entrance.
 - Call: 623.845.3555
- **An Internet Connection:** During this setup process, Windows XP will immediately try to connect to the desired resource location. If you're not connected (e.g., you can't reach any website via your browser) other dialog boxes not talked about in this document.

Setting up a Network Connection to your H: Drive

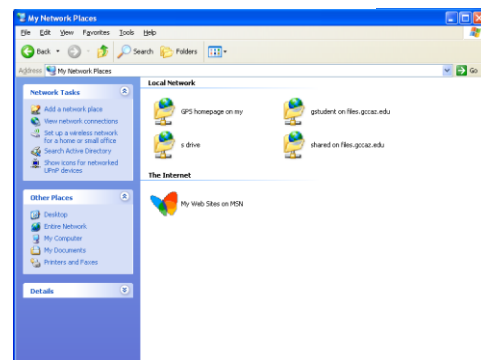

1. Right-click on the **Start** menu and click on **"Explore."** The Windows Explorer window should appear.

2. In the left side of the Windows Explorer window, you may see a sidebar with certain categories: "System Tasks," "Other Places" and "Details." click once on **"My Network Places,"** which is found under "Other Places." If you don't see the categories, simply locate **"My Network Places"** in the folder tree.

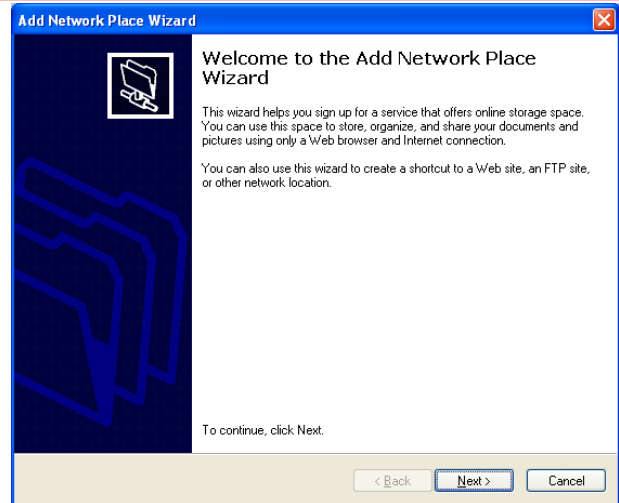

3. The left side of the Windows Explorer window might change slightly. As before, you may see a sidebar with certain categories: "Network Tasks," "Other Places" and "Details." Under "Network Tasks," click once on **"Add Network Place."**

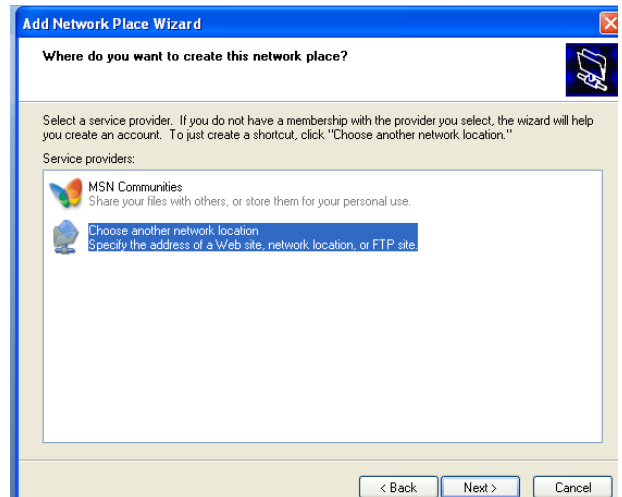

- If you do not see the three categories, please click on the "Folders" button located at the top of the Explorer window. Or, go to View > Explorer Bar and click on "Folders" such that the checkmark next to "Folders" disappears. You should now see the three categories.

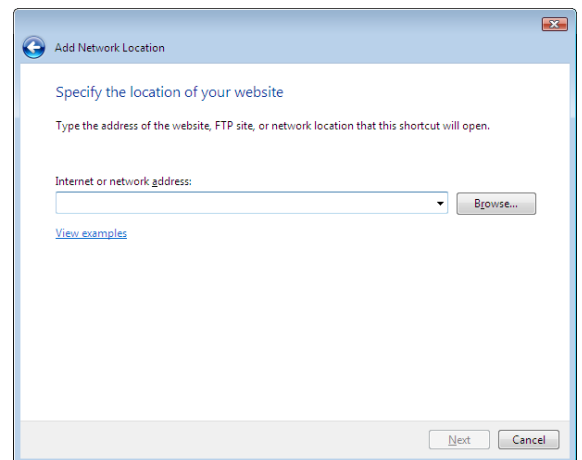

4. When **Welcome to the Add Network Place Wizard** window appears, click **Next**.

5. On the next screen, you should be asked to "Select a service provider". From the options listed, please click on **"Choose another network location. Specify the address of a Web site, network location or FTP site"**. Then, click **"next."**

6. On the next screen, you should be asked: **Type the address of the website, FTP site, or network location that this shortcut will open.** On the screen you should see **"Internet or Network address:"** enter in the box:

On the screen you should see **"Internet or Network address:"** enter in the box: <https://myfiles.gccaz.edu/shared> then click **"Next."**

7. You should see a login box appear, just like the one to the right. Enter the following two items and then click **OK**:
- Username: eGCCUsername
 - Password: eGCCPassword.

8. You should see the text **myfiles.gccaz.edu** in the **Type a name for this network location** textbox. You may either leave the name as-is, or you may rename the shortcut to something else (In this example, we typed "My Courses on eGCC"). Click **Next**.

9. You should now be at the last screen in the Add Network Location wizard (above-right screenshot). Select the "**Open this network location when I click Finish.**" checkbox. Then, click **Finish**.

10. An Explorer window should now appear; in the right-hand pane of the **Explorer** window you should your S: Drive's contents listed. In this example, it is label **My Personal on eGCC**.

Accessing your S: Drive

Now that you've setup the network location for your S: Drive, you may now access it by simply going to the **Start** menu and selecting **Computer**. A window called **Computer** will appear, and you should see the Network Location you just set up.
